ABOUT GUILLAUME

Guillaume has over 30 years' experience of software development covering a wide range of coding languages and architectures. He has worked for MSC R&D on numerous Technical Due Diligence and R&D Tax Credit projects over the last decade.

Guillaume is an ingénieur diplômé (graduate engineer) having received a Diplôme d'Ingénieur (M.Eng) from the Institut supérieur d'électronique de Paris in 1996 and was further awarded a PhD in Computer Sciences by the University of Sheffield in 2003.

For the past 20 years, he has been involved with several high growth organisations in various positions, from CTO to managing director.

As CTO and MD of Dialogue Group, Guillaume was instrumental in the development of several world firsts in the field of mobile communication - and made his first R&D Tax Credit claim in 2007.

In 2011 Guillaume founded the technical systems consultancy AftermathIX and, prior to joining MSC R&D, acted as the principal consultant delivering projects for numerous start-ups and venture capitalist firms. Key projects have included the development of software architectures for massively scalable and mission critical systems.
