ABOUT SAM

Sam is an ICAEW Chartered Accountant (ACA), having qualified following his Masters in Aeronautical Engineering at Loughborough University. He has worked at a tax consultant for over 5 years with a focus on Research and Development Tax Reliefs.

During his Masters, Sam specialised in Computational Fluid Dynamics, writing his dissertation alongside Team Sky (now Team Ineos Grenadiers) on low-speed aerodynamics and their affects on bicycle frames. Upon graduation, he joined Claritas Tax in Birmingham as a Tax Assistant working towards his ICAEW Chartered Accountant qualification.

While at Claritas, Sam worked in a range of tax advisory specialisms including but not limited to Valuations, M&A's, Share Schemes, Venture Capital Tax reliefs and R&D. Early on, he naturally gravitated towards specialising in R&D and hasn't turned back since.

Sam has worked on R&D claims across a wide array of industries including Automotive, Micro Turbines, Chemical Manufacture, Software and even Space. Using his engineering background combined with his Chartered Accountant knowledge, Sam can bridge the gap between technological language and tax legislation, resulting in the ability to provide quality, comprehensive advice for businesses undertaking R&D tax claims.
