ABOUT DEREK

Derek is a computer scientist who joined MSC R&D in 2009 and has since acted as a software specialist on hundreds R&D Tax Credit claims. His PhD (University of Sheffield) was in the field of Parallel Processing and software analysis. His major commercial work has revolved around high performance computing and 3D computer graphics. Consultancy work has seen him working with the likes of nVidia and AMD and all major computer games publishers as well as other creative industries.

He has set up several companies relating to technology in the golf industry and provided research work to several sports clients including Adidas. This research typically revolves around application of 3D technologies or techniques.

Derek is a Fellow of the British Computer Society and a Chartered IT Professional. He has an MBA with particular interest in innovation management and market strategy. He provides Monitoring Officer services to Innovate UK, monitoring the planning and progress of Innovate UK grant winners.

Derek is an Associate Lecturer at Sheffield Hallam University and attends Science, Technology, Engineering and Mathematics (STEM) education events with schools when possible.
